

Improved Formulation starting with Batch 331

Ultra Plus UVP is one of our most reputable ink systems. Some of the UVP ingredients, however, are now being switched to new, state-of-the-art raw materials.

The new formulation meets the latest standards and, as a further effect, it offers improved surface appearance and rheology. Further changes in the technical properties are not expected.

The new and the previous formulation are mixable with each other.

For further information on Ultra Plus UVP please refer to www.marabu-inks.com

Date of Change-over

This change becomes effective starting with **batch 331 (immediately)**. The change can be identified by the additional label:

„Attention: Improved Formula“
